WILSONIAN

Newton,
So are the
"nuts" in the senior
class. Good luck
in the future. Hope
you & Barbie stay
together.
Bob

Newton,
To a really great donkey who I've
had a lot of fun with. Never forget
our I class cruises, your stories & pictures,
Halloween, sneaking to Seaside
when Linda drank wine, and
the fun we've had since.
Best of luck
this winter. Best of luck
and don't let the customs
get the best of you.

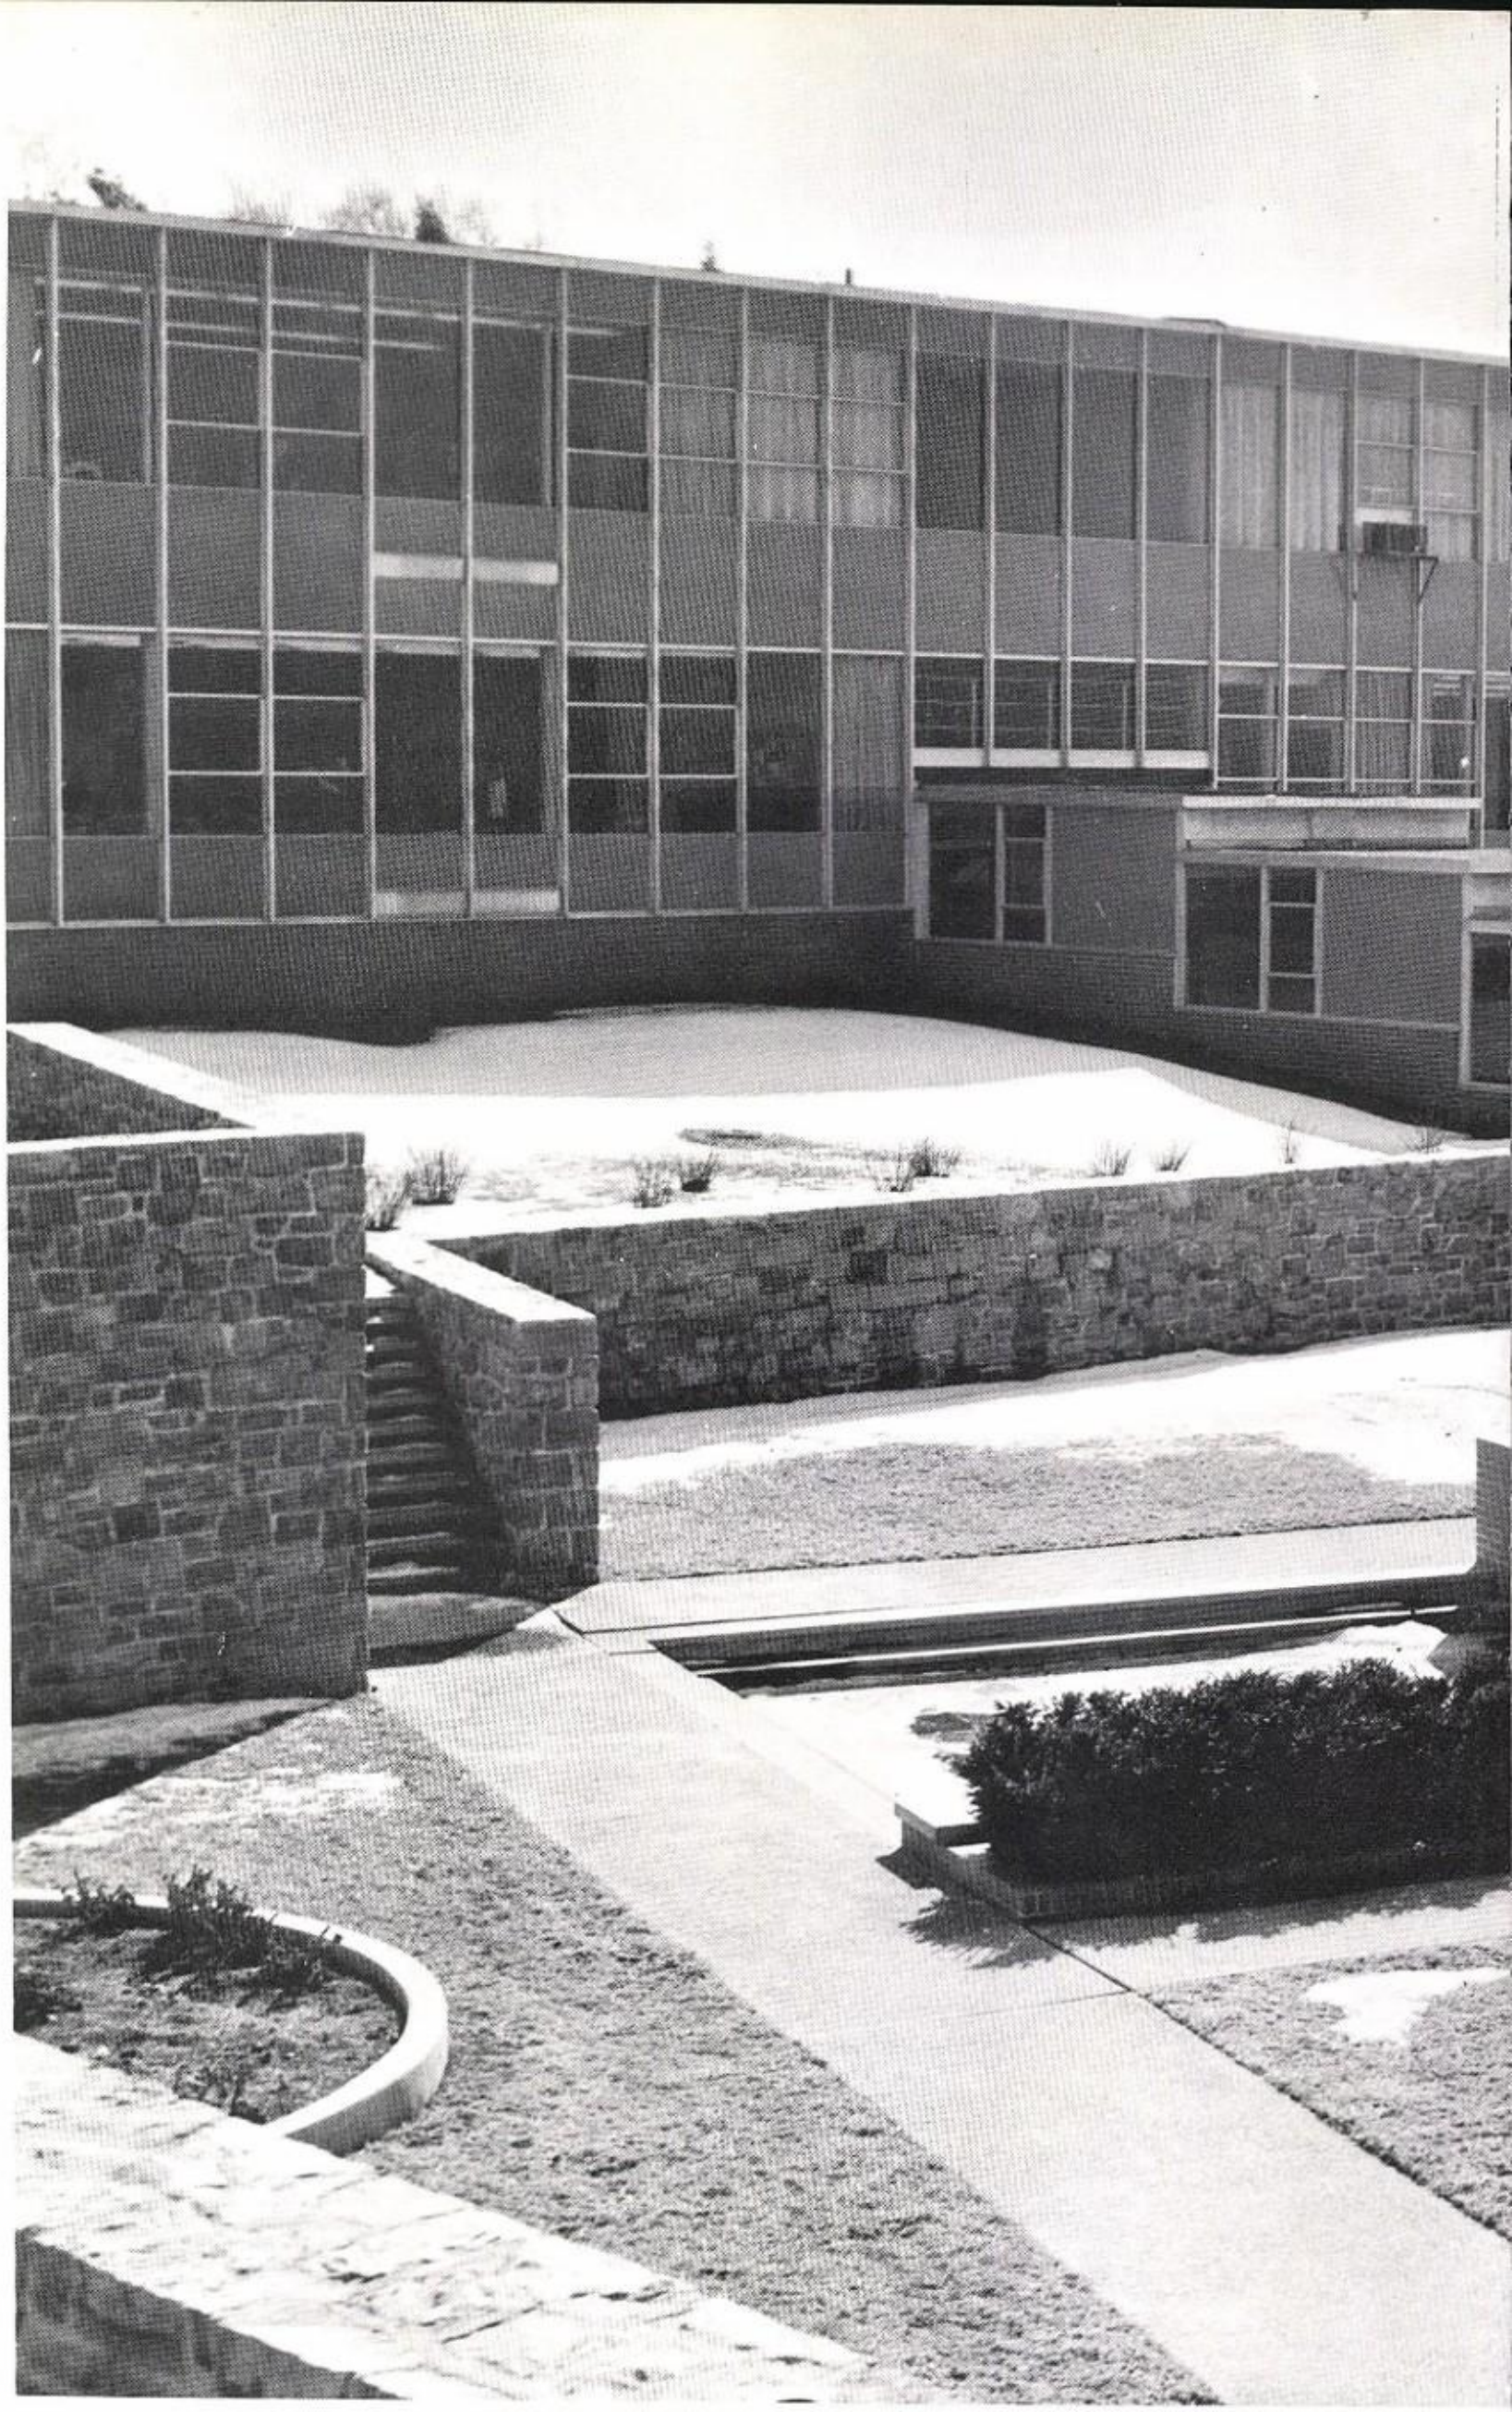
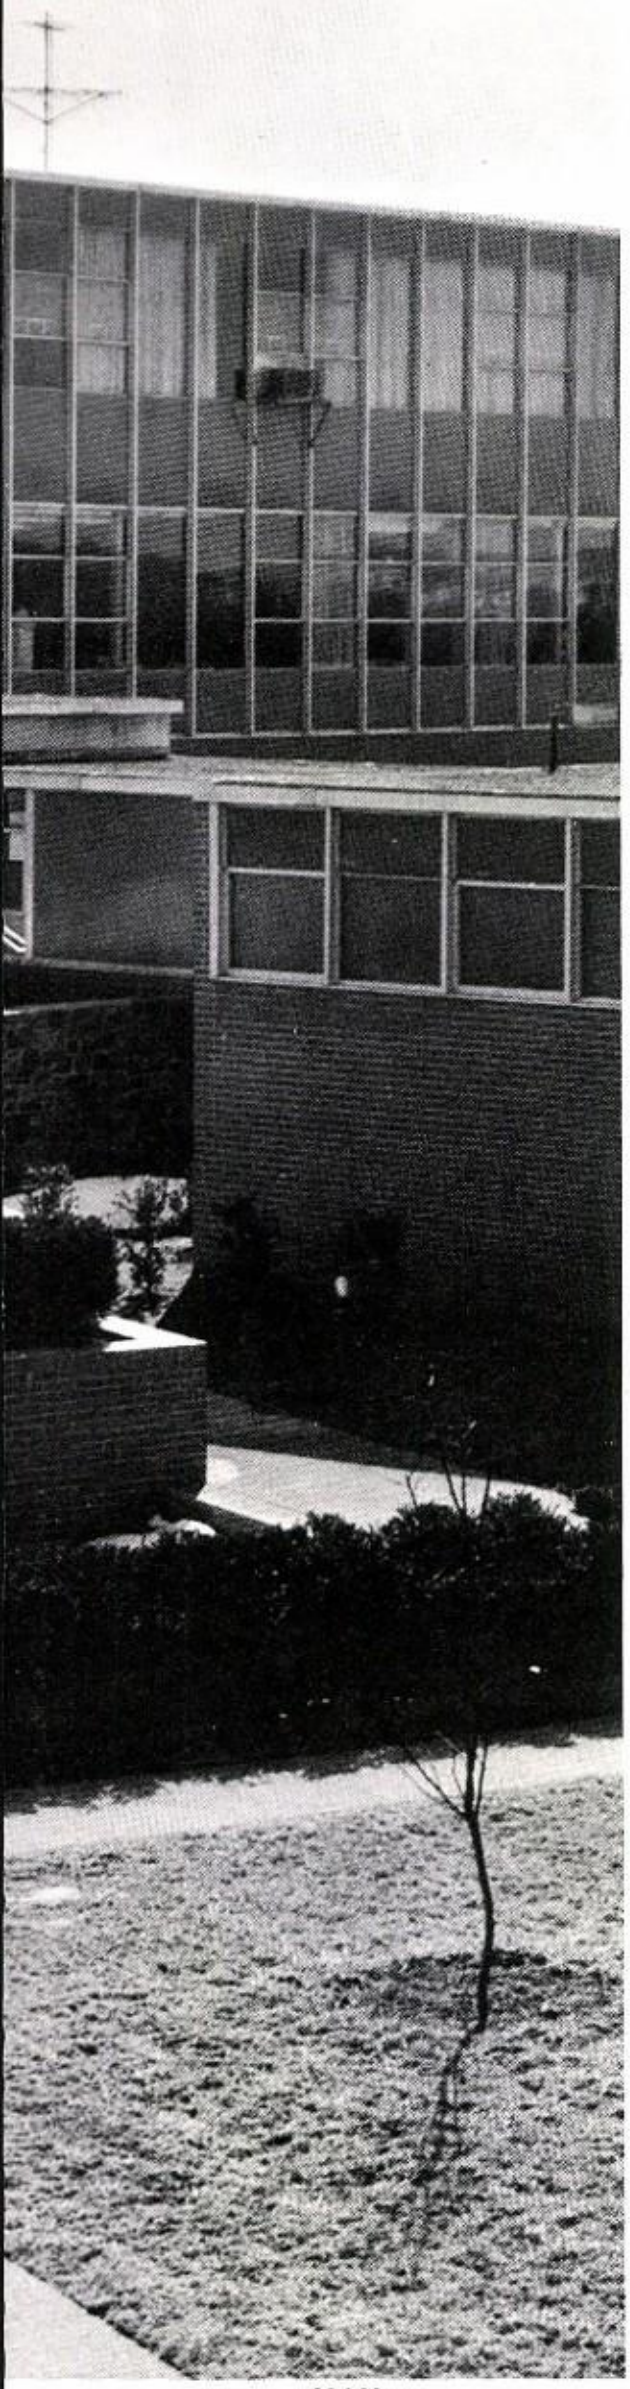
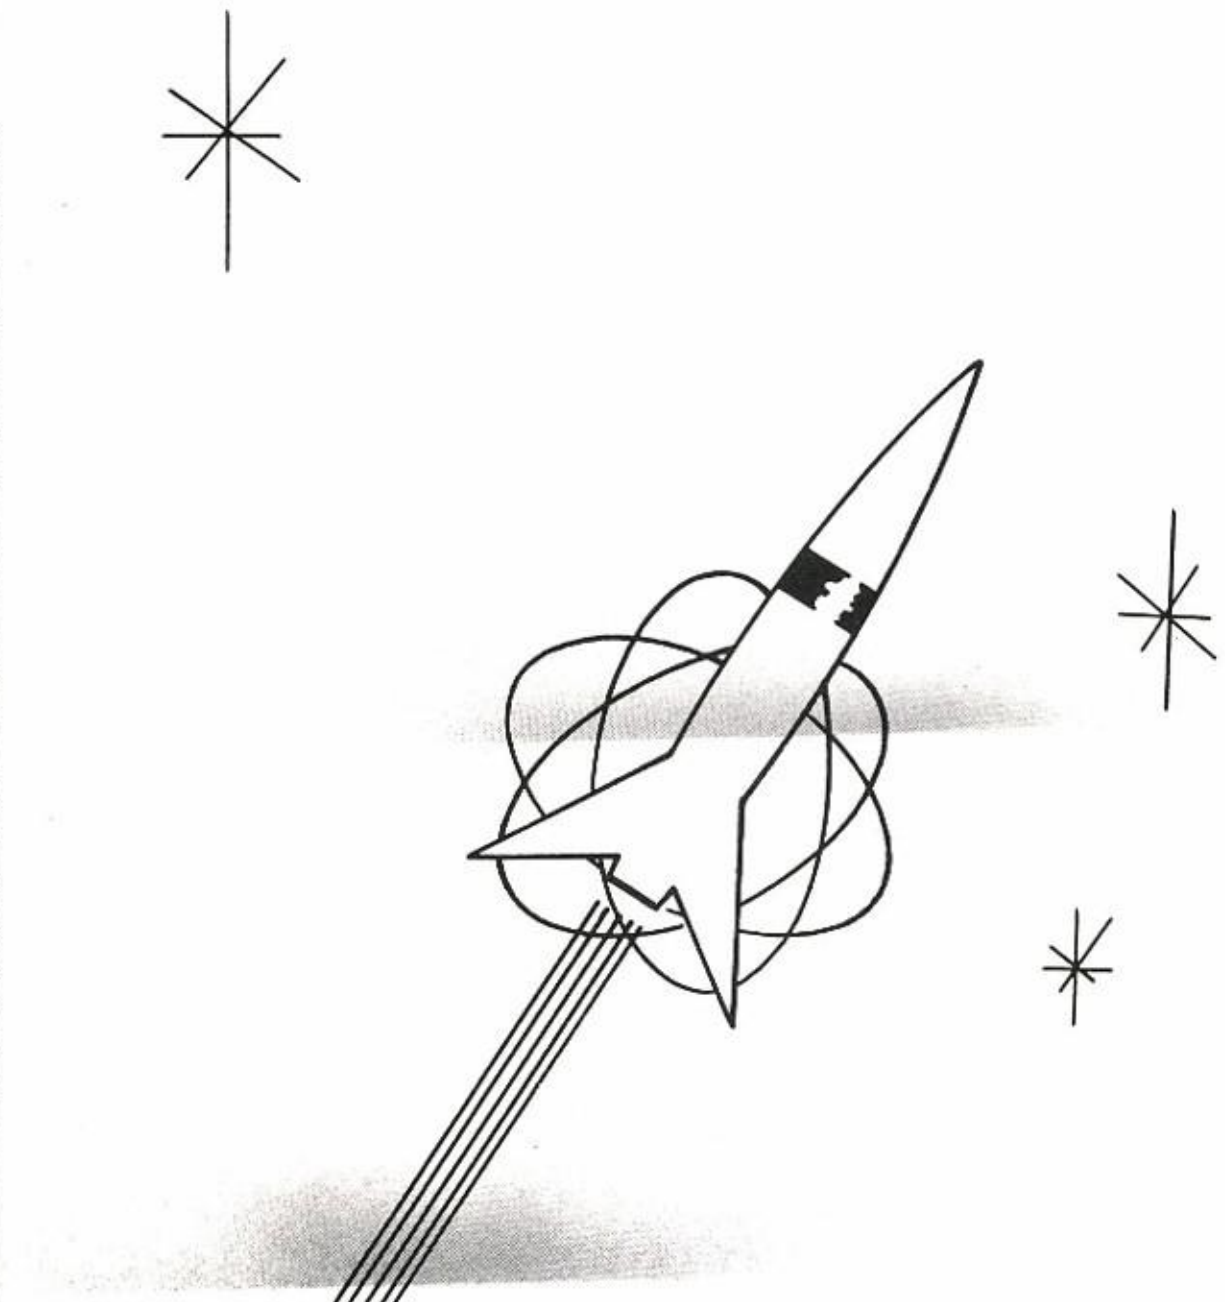
BLAST-OFF INTO THE FUTURE







THE 1963 WILSONIAN

PRESENTED BY THE SENIOR CLASS OF
WILSON HIGH SCHOOL
WEST LAWN, PENNSYLVANIA

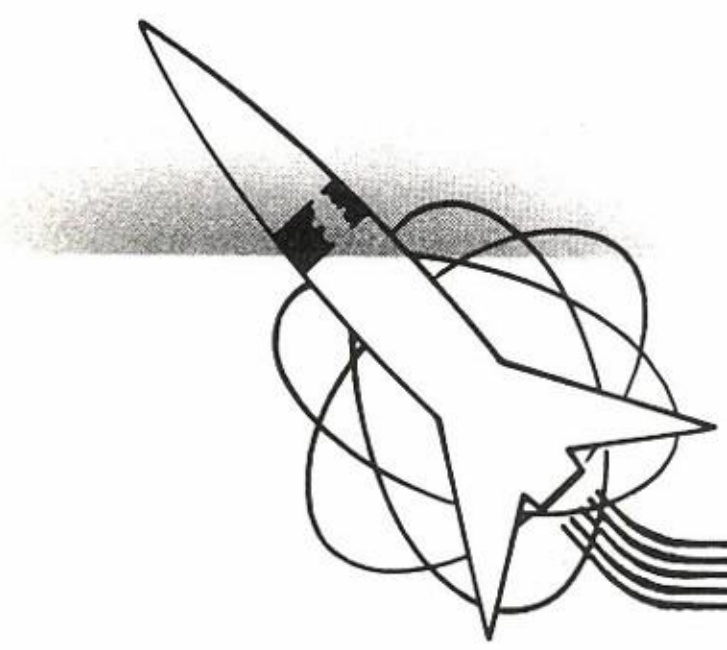
TO THE GRADUATING CLASS OF 1963:

I am pleased that you are interested in "space." Certainly the "space age" is opening up many new and exciting opportunities to the young people of today. We have reached an age in history where nations are more powerful than ever before. The more powerful we as individuals and as a nation become, the more complex our lives become. With this tremendous increase in our capabilities, we must also assume a corresponding increase in our responsibilities. This applies in all fields of endeavor, whether it be physically going into space, studying in a school or laboratory, experimenting on new ways of teaching or manufacturing, exploring new means of guaranteeing free and effective government, or having the courage to do that which we know is right in our every day lives.

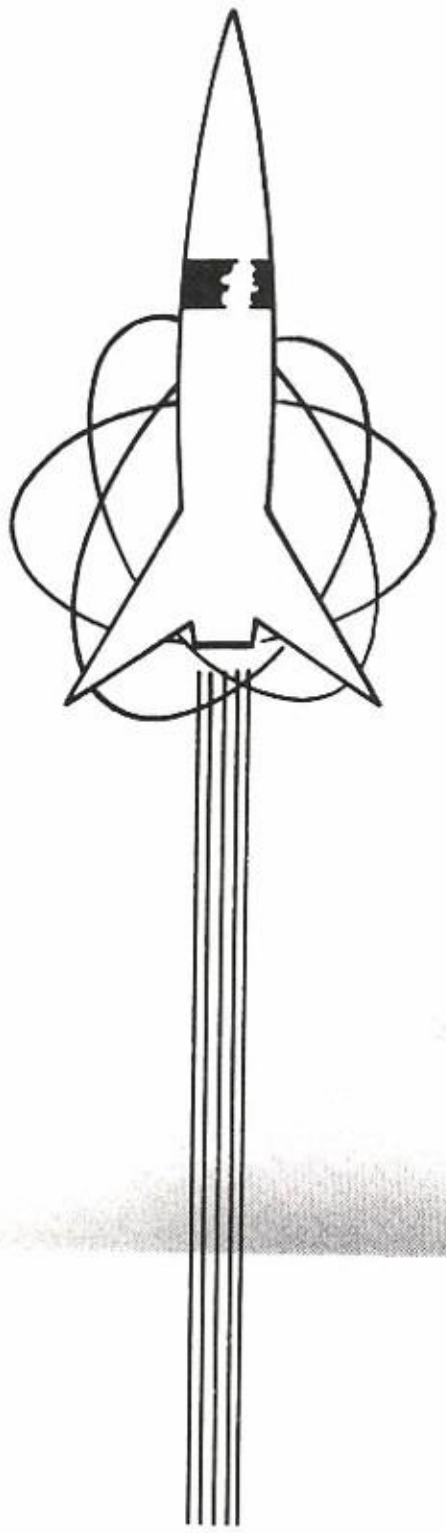
For all practical purposes, our nation is as strong as its individual citizens. If we are to be effective citizens, each person must set realistic goals for himself in development of his body, his mind, and his spiritual life. An individual rarely makes any concrete accomplishment by merely drifting through life. The best way I know to assure a productive life is by giving a direction, purpose, and goal to each of the above-mentioned areas. The challenges of the future are many, and the future will go to those who are adequately prepared. My best regards to each of you as you face these challenges of the "space age."

John H. Glenn, Jr.
Lt. Colonel, USMC
NASA Astronaut



DEDICATION

In appreciation of his loyal service, we, the class of 1963, gratefully dedicate this issue of the WILSONIAN to Mr. Paul E. Strunk. As a member of the business department, he has contributed generously of his time and ability to insure the success of various projects undertaken by our class. His spirit of willing cooperation, his sincerity and industry, and his friendly understanding have won our admiration and respect.



ENGINEERS AND TECHNICIANS PROVIDED FOR A SMOOTH LIFT-OFF

The administration and the faculty, serving as engineers and technicians, laid the basic ideas and concepts that will lead to a successful flight through the obstacles of each astronaut's life.

WILSON'S SPACE AGENCY

Providing finances and establishing policy for the astronauts' training grounds, Wilson's Space Agency and Building Authority meets monthly to solve intricate and far-reaching problems involved in the operation of a complex institution for the training of young minds. The Space Agency is composed of three member districts: Lower Heidelberg Township, Sinking Spring Borough, and Spring Township. These districts have worked together as a jointure since July, 1954. The Building Authority (left) created in April 5, 1956, by the Commonwealth, has the function of constructing and leasing school buildings to the school board.

Members of both the school board and the building authority serve without pay, giving freely of their time and talents to provide the best facilities for the optimum development of youth who will, in turn, become worthwhile and contributing members of society.

WILSON'S CHIEF SPACE DIRECTOR

To graduates -- Class of 1963:

You have selected the theme "Space Age" for your annual, a challenge timely and significant in education today and tomorrow.

May each of you as graduates remember well the quotation of a great American military leader who sized up the magnitude of the challenge you face. General Douglas MacArthur said, "You now face a new world, a world of change." The thrust into outer space of the satellites, spheres and missiles is the beginning of another effort in the long story of mankind. In the five or more billion years the scientists tell us it has taken to form the earth, in the three or more billion years of development of the human race, there has never been a more abrupt or staggering revolution.

Yes, the basic principles of spacemanship are being taught in the classrooms of America right now. To insure a better, growing America, continue your education either through college and graduate school or technical training for strengthening our man power for space age triumphs.

Major Robert M. White, U.S.A.F. offers this advice to future astronauts with great ambition to keep "pace with the Space Age." "The gateway to space is through the doorways of our schools, and there is no conceivable short cut."

Our best wishes to all of you as some of you may prepare to participate in a new logical aerospace step in human progress.

Sincerely,

William C. Kutz

PROJECT ENGINEER SPEAKS . . .

Dear Graduates:

On the morning of Friday, May 5, 1961, Cape Canaveral, Florida, was the scene of an historic event. On that memorable day, Commander Alan B. Shepard, Jr., America's first astronaut, was hurled through the reaches of the stratosphere, and beyond, into the fringe of outer space. The successful launching of this space craft was followed shortly thereafter by a safe landing of Astronaut Shepard at a distance 302 miles from Cape Canaveral, only 7 miles from the planned landing point. That day the oft-repeated "go" word "A-Okay" became the signal reminder of our entry into the Space Age.

According to President Kennedy, the benefits from the "peaceful space program," are becoming increasingly evident. "Not only have the horizons of scientific knowledge been lifted, but the resulting international cooperation and world-wide dissemination of knowledge and understanding have strengthened the world image of this country as a force for peace and freedom." Along with the space program and its accompanying challenges, we must not turn a deaf ear to the constant pleas for support from our institutions of higher learning. We dare not take the risk of having "too few and too late" the necessary facilities and trained personnel required to educate our ever-growing population if we expect to maintain our country's position as a world leader. We will count on you, as Wilson graduates, to take an active interest in meeting these challenges.

The faculty joins me in wishing you a happy, successful, and "A-OKAY" future.

Sincerely yours,

Clayton D. Rehrer

SENIOR HIGH ENGINEER

TO THE CLASS OF 1963:

With the launching of an artificial earth satellite in 1957, man entered a new and challenging frontier, the space era. The vastness of this space is all but incomprehensible to the human intellect. It can, however, be conquered as our forefathers conquered the wild and dangerous frontiers during their time.

The activities in space will change your thinking, your reading, your conversation and many facets of your everyday life. You, the youth of America, will have to face the ominous threat of communism; the prospect of thermonuclear war; the inherent dangers of travel into space to study communications and gather data on cosmic rays, radiation, navigation and even the possibility of war in space.

If you are going to win this new frontier, you must have an unquenchable thirst for knowledge of the unknown, as well as vision, courage, and a firm belief in the Almighty God.

It is your duty to grow through education and be strong enough mentally and physically to meet whatever the future has in store for you in this new frontier. I am certain you will find it a thrilling and worthwhile experience.

Good luck and may God's blessing go with each one of you in your life's work.

Dr. Aaron R. Miller

Dr. Aaron R. Miller

JUNIOR HIGH ENGINEER

The members of the junior high school faculty join me in extending to you sincere congratulations upon the completion of your secondary school program.

Our nation needs now, and will need even more in the years that are ahead, highly trained men and women to meet the demands of our complex society and to sustain us as a great nation. The young people in America will need to continue to develop themselves to the fullest measure of their potentials to successfully meet these challenges.

We are standing on the threshold of space explorations. We have witnessed with anxiety the first American orbital flights and are following with interest the development of the Gemini project and later lunar explorations. The recent rendezvous of the Mariner II spacecraft with our morning star, Venus, has given us valuable information that may lead to inter-planetary flights in our times.

While our attention is directed toward the activities in space, let us not be unmindful of the undesirable forces maneuvering into positions that become increasingly difficult to contain, thus bringing embarrassment to our influence and leadership in the world of neighbors and threatening the very ideals of freedom and justice that we call Democracy.

Our best wishes to you for a successful future.

Sincerely,

Arlan R. Moyer

IN MEMORIAM

On October 23, 1962, Sidney Twardowski passed from his many friends and fellow classmates, leaving a void that will never be filled. His quiet manner and pleasant nature will never be forgotten. An active member of both the football and basketball teams and the school band, he was an asset to all activities in which he participated. His friendship and his understanding were well known traits that were valued by all who knew him. The memory of many hours spent in classrooms, in sports, and in social activities will be forever within these pages with us, his classmates.

RELAXING FROM BUSY TRAINING ROUTINES

Just as all things need rejuvenation from rigid schedules, so Wilson's Astronauts relax and rejuvenate in a variety of extracurricular activities. This change of pace provides for an energetic "bouncing back" to the serious business of studies, and also provides the opportunity for developing all the aspects of our Astronauts.

Darren, my very best friend,

To my very best friends,

Very best friends,

Dear Vicki's parties,

Vicki's parties,

the games, dances, parties,

Christmas dance,

New Year's Eve, Christmas dance,

class plays, Christmas Prom,

Lake Shallenpoint Lodge, Valentine Prom,

airport, Wallenpoint Lodge, Mom Chabbis,

County, square dancing, Mom and

Covington Hop, Moselem Springs Inn, and

Coventry. Remember the wiener dance

everything we forget our few arguments & tears - always

try to forget our happy times - where are more of them

anyway. Remember the ballgame & dances, smiles,

years, problems and fun we shared: Remember

Hershey, mountains with Jim & Lee, Leo's with Jim & Jean.

Dale, and the mountains with Jim & Lee, Leo's with Jim & Jean.

Always remember our high school fun,

for it's just a preview of the fun and

good times ahead of us. Do not fear to tell

you to stay the same sweet, wonderful person

you are now, because you are what you are

(and I think it's great) and no one can change it

And what you are is the most wonderful

person anyone could ever know. To you I

wish the best of luck at Kutztown - you'll

be the best designer engineer ever - ever and

good as your Daddy. While I'm away, I hope

you'll spend lots of time with Liz Rage you next

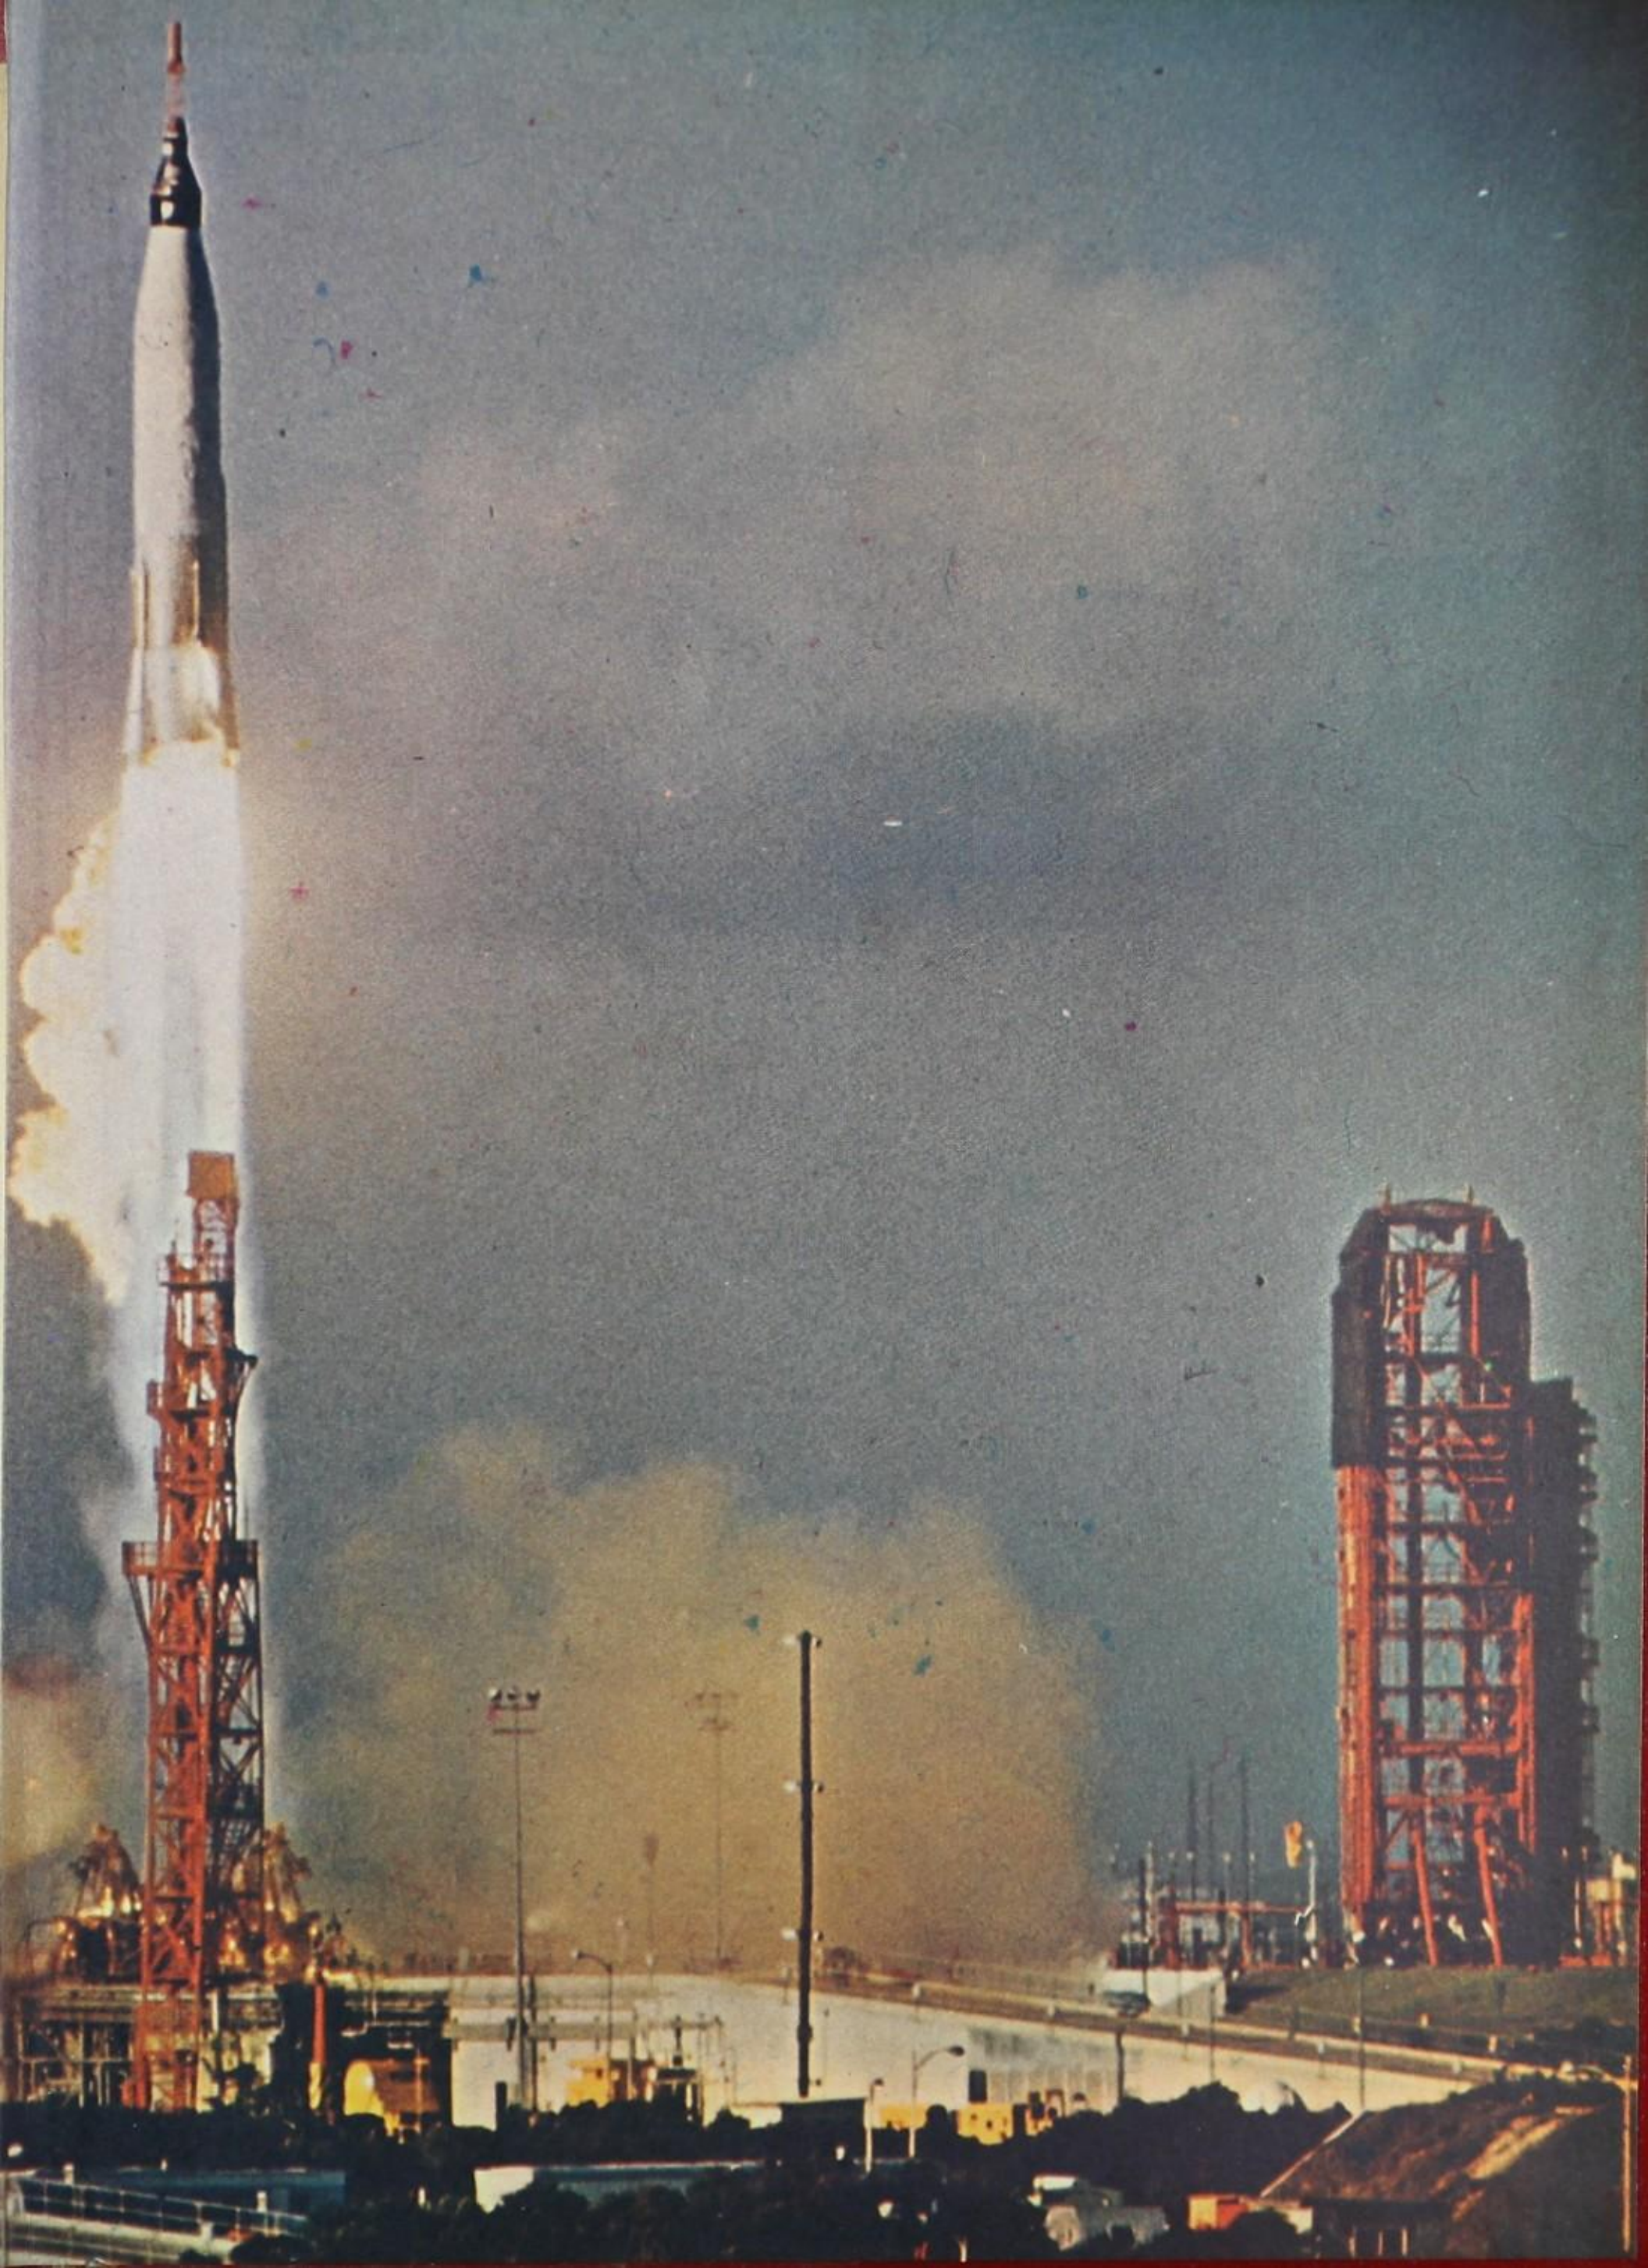
best girl, and cuddle her. Liz Rage take my

place for a little while. Always think

happy thoughts and dream happy dreams

and someday will make those dreams

come true. Remember the 3 most

spoken words - I love you.


Bones
